Tip

Most custodians send these transactions between one day and two weeks after the initial corporate action; they can be identified by the Notes field, which usually includes the abbreviation CIL as well as the symbol. To properly account for Cash in Lieu, edit the custodial transaction and make the following changes:

1. Change the Security Type to the proper type for the security involved, usually Equities
2. Change the activity to Sell.
3. Change the Symbol to the security symbol.
4. Enter the fractional share quantity, which can be found on the Share Reconciliation report.
5. Change the matching method to First In First Out.
6. Post the sell transaction.

After performing these steps, both shares and cash should reconcile.
